

# Cyber Security Policy

## 1. Introduction

- 1.1. This Data Security Policy is *Krause and Hall's* (hereafter referred to as "us", "we", or "our") policy regarding the safeguarding and protection of sensitive personal information and confidential information as is required by law (including, but not limited to, the Data Protection Act 2018, Health & Social Care Act 2012, and the Common Law duty of confidentiality).

## 2. Purpose

- 2.1. The purpose of this document is to outline how we prevent data security breaches and how we react to them when prevention is not possible. By data breach we mean a security incident in which the confidentiality, integrity or availability of data is compromised. A breach can either be purposeful or accidental.
- 2.2. This Data Security Policy covers:
- 2.2.1. Physical Access procedures;
  - 2.2.2. Digital Access procedures;
  - 2.2.3. Access Monitoring procedures;
  - 2.2.4. Data Security Audit procedures;
  - 2.2.5. Data Security Breach procedures.

## 3. Scope

- 3.1. This policy includes in its scope all data which we process either in hardcopy or digital copy, this includes special categories of data.
- 3.2. This policy applies to all staff, including temporary staff and contractors.

## 4. Physical Access Procedures

- 4.1. Physical access to records shall only be granted on a strict 'Need to Know' basis.

## Cyber Security Policy

- 4.2. During their induction each staff member who requires access to confidential information for their job role will be trained on the safe handling of all information and will be taught the procedures which govern how data is used, stored, shared and organised in our organisation.
- 4.3. Our staff must retain personal and confidential data securely in locked storage when not in use and keys should not be left in the barrels of filing cabinets and doors.
- 4.4. All offices, when left unoccupied, must be locked unless all personal and confidential information has first been cleared off work stations/desks and secured in locked storage.
- 4.5. The Information Asset Register (IAR) will contain the location of all confidential and sensitive personal information.
- 4.6. We will risk assess each storage location to ensure that the data is properly secured. This risk assessment forms part of the IAR.
- 4.7. An audit will be completed at least annually to ensure that information is secured properly and that access is restricted to those who have a legal requirement to use the information. The details of this audit are outlined in the Data Security Audit Procedures [7] below.

## 5. Digital Access Procedures

- 5.1. Access shall be granted using the principle of 'Least Privilege'. This means that every program and every user of the system should operate using the least set of privileges necessary to complete their job.
- 5.2. We will ensure that each user is identified by a unique user ID so that users can be linked to and made responsible for their actions.
- 5.3. During their induction each staff member who requires access to digital systems for their job role will be trained on the use of the system, given their user login details, and they will be required to sign to indicate that they understand the conditions of access.
- 5.4. A record is kept of all users given access to the system. This record can be within the IT system admin control panel.

## Cyber Security Policy

- 5.5. In the instance that there are changes to user access requirements, these can only be authorised by the Data Security and Protection Lead.
- 5.6. The IAR will contain the location of all confidential and sensitive personal information which is digitally stored.
- 5.7. We will follow robust password management procedures and ensure that all staff are trained in password management.
- 5.8. As soon as an employee leaves, all their system logons are revoked.
- 5.9. As part of the employee termination process the Data Security and Protection Lead is responsible for the removal of access rights from the computer system.
- 5.10. The Data Security and Protection Lead will review all access rights on a regular basis, but in any event at least once a year. The review is designed to positively confirm all system users. Any lapsed or unwanted logons which are identified are disabled immediately and deleted unless positively reconfirmed.
- 5.11. When not in use all screens will be locked and a clear screen policy will be followed.

### 6. Access Monitoring Procedures

- 6.1. The management of digital access rights is subject to regular compliance checks to ensure that these procedures are being followed and that staff are complying with their duty to use their access rights in an appropriate manner.
- 6.2. Areas considered in the compliance check include whether:
  - 6.2.1. Allocation of administrator rights is restricted;
  - 6.2.2. Access rights are regularly reviewed;
  - 6.2.3. Whether there is any evidence of staff sharing their access rights; **staff should know that this can result in disciplinary procedures unless you specifically authorised**
  - 6.2.4. Staff are appropriately logging out of the system;
  - 6.2.5. Our password policy is being followed;

## Cyber Security Policy

6.2.6. Staff understand how to report any security breaches.

### 7. Data Security Audit Procedures

- 7.1. Confidentiality audits will focus on controls within electronic records management systems and paper record systems; the purpose being to discover whether confidentiality has been breached, or put at risk through deliberate misuse of systems, or as a result of insufficient controls. Audits of security and access arrangements within each area are to be conducted on a six-monthly rolling programme. **How frequently you audit information can vary, but as a minimum there should be a full annual audit.**
- 7.2. Audits will be carried out as required by some or all of these methods:
  - 7.2.1. Unannounced spot checks to random work areas;
  - 7.2.2. A series of interviews with management and staff, where a department or area of the organisation have been identified for a confidentiality audit.
  - 7.2.3. Based on electronic reports.
- 7.3. The following checks will be made during data security audits:
  - 7.3.1. Failed attempts to access confidential information;
  - 7.3.2. Repeated attempts to access confidential information;
  - 7.3.3. Access of confidential information by unauthorised persons;
  - 7.3.4. Appropriate recording and/or use of consent forms;
  - 7.3.5. Appropriate allocation of access rights to confidential information, both hardcopy and digital;
  - 7.3.6. Security applied to PCs, laptops and mobile electronic devices;
  - 7.3.7. Appropriate transfer and data sharing arrangements are in place;
  - 7.3.8. Appropriate staff use of computer systems, e.g. no excessive personal use, no attempting to download software without authorisation, use of social media, attempted connection of unauthorised devices etc.

### 8. Data Security Breach Procedures

- 8.1. In order to mitigate the risks of a security breach we will:

## Cyber Security Policy

- 8.1.1. Follow the Physical Access, Digital Access, Access Monitoring and Data Security Procedures;
- 8.1.2. Ensure our staff are trained to recognise a potential data breach whether it is a confidentiality, integrity or availability breach;
- 8.1.3. Ensure our staff understand the procedures to follow and how to escalate a security incident to the correct person in order to determine if a breach has taken place.
- 8.2. In the instance that it appears that a data security breach has taken place:
  - 8.2.1. The staff member who notices the breach, or potential breach, will complete a Data Security Breach Incident Report without delay;
  - 8.2.2. This form will be completed and handed to the Data Security and Protection Lead or, if they are not available, to a member of senior management;
  - 8.2.3. The Data Security and Protection Lead will complete the rest of the Incident Report Form and conduct a thorough investigation into the breach;
  - 8.2.4. In the instance that the breach is a personal data breach and it is likely that there will be a risk to the rights and freedoms of an individual then the Information Commissioner's Office (ICO) will be informed as soon as possible, but at least within 72 hours of our discovery of the breach.
  - 8.2.5. As part of our report we will provide the following details:
    - 8.2.5.1. The nature of the personal data breach (i.e. confidentiality, integrity, availability);
    - 8.2.5.2. The approximate number of individuals concerned and the category of individual (e.g. employees, mailing lists, service users);
    - 8.2.5.3. The categories and approximate number of personal data records concerned;
    - 8.2.5.4. The name and details of our Data Security and Protection Lead
    - 8.2.5.5. The likely consequences of the breach;
    - 8.2.5.6. A description of the measures taken, or which we will take, to mitigate any possible adverse effects.

## Cyber Security Policy

8.2.6. The Data Security and Protection Lead will inform any individual that their personal data has been breached if it is likely that there is a high risk to their rights and freedoms. We will inform them directly and without any undue delay;

8.2.7. A record of all personal data breaches will be kept including those breaches which the ICO were not required to be notified about.

### 9. Responsibilities

- 9.1. **Tom Krause** is responsible for physical security;
- 9.2. **Tom Krause** is responsible for digital access;
- 9.3. **Tom Krause** is responsible for managing breaches;

### 10. Approval

- 10.1. This policy has been approved by the undersigned and will be reviewed at least annually.

**Managing Director**  
**Krause and Hall Ltd**
